

They are not little kids anymore,
but they still need **you** to help
protect their future.

PROTECT YOUR CHILD FROM 5 SERIOUS DISEASES & HPV-RELATED CANCERS.

Start the series at their 11 or 12 year old health check-up,
but it's never too late to catch-up and protect their future.
Also, ask the doctor about the yearly flu vaccine and any
other vaccines your child might need.
