

WhyImmunize.org

Happy. Healthy. Immunized!

1. History

TAPI's mission is to foster a comprehensive, sustained community program for the immunization of Arizonans against vaccine preventable diseases.

This manual was developed to assist doctor's offices and clinics in creating an immunization friendly environment.

Many parents express concern about immunizing their children. The reassurance offered by a health care provider's staff can reduce anxiety and reassure a parent that they are making the right choice for their child. The encouragement will also keep parents coming back to keep children's immunizations up to date.
